

**WORLD FEDERATION
FOR CHESS COMPOSITION**

**10th WORLD CHESS COMPOSITION
TOURNAMENT 2015-2017**

**PRELIMINARY
AWARD**

July 2017

The 10th World Chess Composition Tournament (WCCT) of the WFCC is completed. In total 38 countries participated in the tournament with 684 compositions in eight sections.

My sincere thanks to the team captains, the coordinators and judges in the countries as well as to Harry Fougiaxis (the WFCC President and the Director of previous WCCT), all of whom helped to ensure that the tournament was concluded successfully and in line with the schedule.

This document contains preliminary results after the main judgement and coordination round intended to bring together the judges' positions on problems with zero marks. I want to remind that if a composition has received a zero score from two or more judging countries it is excluded from the tournament and receives no points.

Several big changes were made to the tournament rules. First, this tournament has included a new section (retros), while only 7 best section results are taken into account for team score. Second, the highest and lowest marks for the problem are discarded in all cases and if a composition belongs to a judging country, the sum of the two middle scores multiplied by one and a half becomes the score for the problem. Third, the scale step of 0.2 was introduced instead of 0.5 in previous tournaments it is yet to determine if the latter change is an improvement, though I have received one complaint that it is more difficult to judge using new scale.

According to the rules only the best two compositions score the points for the country, while the third, if it does not make in "Top 20" is not included in the award at all and not considered published. Such problems are striked through in the tables. There were a number of cases when second and third problems of the same country scored equal points. In such cases the problem with higher best mark was left in the award.

Georgy Evseev
The Director of 10th WCCT
