

5th YCCC 2021

THE AWARD

WCCC2021

63rd WCCC & 44th WCSC

Award of the 5th YCCC

Introduction

The 5th YCCC 2021 attracted not less than 50 participants from 12 countries (Azerbaijan, Canada, France, India, Israel, Japan, Romania, Russia, Serbia, Ukraine, USA and Vietnam), doubling the numbers of the record breaking 4th YCCC 2019.

Apart from several regular YCCC participants who have already become active composers, the field was dominated by new names. For many, these were the first attempts in composing, but the overall quality was high above all our expectations!

The sudden increase in quantity and quality wouldn't be possible without a growth of support to YCCC. This time, the [YCCC announcement](#) was advertised wider than before, with important contributions by Frederic Friedel and his [Chess Base article](#), Yochanan Afek, Gady Costef, Satanick Mukhuty, and others who joined Youth Committee in promoting YCCC. In order to extend the competition to all the genres (Section C), the team of judges was multiplied, and 12 experts gladly accepted to comment, advice and mark the entries. With so much of good will, the concept of workshop helped the participants interested in improving.

There was no need to change the judges in two thematic sections. We were lucky to have again the same passionate David Shire (#2), Steffen Slumstrup Nielsen (+=), and Wieland Bruch, who kindly helped with anticipations in #2. The Section C was a very successful novelty, attracting 39 young composers. It asked for a group of judges, and each of them showed exceptional enthusiasm. Last but not least, the permanent YCCC director Julia Vysotska designed announcement, medals, certificates and final booklet, gladly adding her touch to all of it.

With all this in mind, the 5th YCCC was a double success, both in attracting new talents, and in joining forces to help new generations. It rediscovered the human side of chess composers, whose love for our art goes far beyond their own results.
