I received 47 anonymous entries from the 9th World Cup Director Yuri Bazlov. The author of **A35** asked the Director to withdraw his composition from the competition following the discovery of an anticipation. Thus, 46 twomovers were evaluated.

The level of the tournament was fairly high; a total of 13 entries appear in the award.

Unfortunately, quite a lot of the entries showed scarce or unimpressive content; moreover, some were anticipated. Naturally, there was no chance for these problems to appear in the award.

For a number of reasons, several real contenders were eventually not included in the award. Probably, they would have done better in case of a different judge or if some points that I consider to be drawbacks had been eliminated.

Thus, **A01** (1.Bb4?) and **A04** (1.S4g5?) have thematic dual mates. I am no fan of themes involving duals; and as to Makihovi theme I appreciate it only when it involves set play and so such dualisticity is in my view undesirable. Certainly, these phases could be ignored, but it does not seem right to depart from the author's interpretation of the content.

Moreover, in **A01** ♜e7 does not participate in post-key play (it is easy to correct this by replacing black pawn e6 with a white one). I tolerate the presence of white officers uninvolved in post-key play,

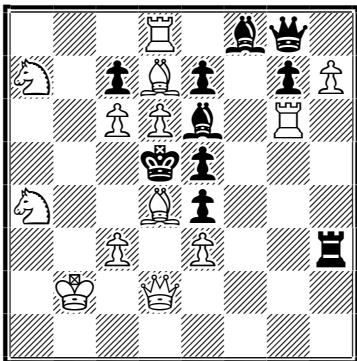

but this should be avoided whenever possible.

In **A11**, the refutations of tries are not quite satisfactory, being captures of the piece that made the first move.

In **A47**, ♘b3 is not needed in the post-key phase; moreover, there are duals in non-thematic variants and a checking refutation. The impression is that the author failed to find an optimal construction for presenting a good idea.

Entries **A08**, **A29**, **A34**, **A35** and **A38** are based on rather well-known matrices and I don't see any fresh content in them.

So here is the award.
