1.Dh8!(~?) Lh2 2.Da1!(Da8?) Lb8 3.Da8 Sd6#

Pericritical corner to corner maneuvers towards a1/a8 (around g1/b8), before opening 1st rank/closing 8th rank.

B2(Dh8-a1)=anticipatory tempo-losing, transferred from virtual B3 (2.Dh8-a8? Lb8 3.tempo??), proves that B1(Dh1-h8) is just a waiting move (1.~ Lh2 2.Dh1-a1). Thus the tempo-losing is transferred from virtual B3 to ostensible B2 and then to actual B1.
