---

From the tournament director Alexandr Bulavka I received 33 originals on identical diagrams with solutions but without authors' names.

Due to defect, I excluded the problem G07 - no solution in twin "c".

In the first version of this award, I mistakenly pointed out the problem G30 as incorrect (a cook after 1. ♖e2?) because of an error in my computer test. I apologize to the author! Now I am adding up in the award this very good problem which in my opinion deserves a special prize.

The level of the tournament was high, with a number of very interesting and non-standard problems being presented. This assessment especially applies to the problems awarded with prizes. I would like to thank my colleague, Geoff Foster, for the English version of my award.

I propose the following ranking:

~

1<sup>st</sup> Prize – Gold medal  
MARIO PARINELLO  
*Italy*

h#2                    3 sol                    7+10  
Anti-Kings  
Circe

Remember that under the condition 'Anti Kings' a King is in check if it is not attacked by an enemy piece.

In this problem such a strange situation can be achieved if the attacks by ♔c8 and ♠h8 against the black ♙a8 are eliminated. The realization of this paradoxical idea is demonstrated here in a very original and beautiful way in 3 solutions, using also as an additional condition the well-known and much-loved Circe.

The three black thematic pieces Queen, Bishop and Knight demonstrate a wonderful cyclic ensemble with motifs of self-block + closing of the last rank after a Circe capture + and preserving control over the white King. The White Queen shows maximum

unusual creative achievement that deserves a very high rating!

a) 1. ♖:f4-d6+ ♜f4 2. ♙:e7-e1 ♚:d3-d2+ 3. ♜:f4-d3+ ♙:d3-f4#

b) 1. ♖:e7-e4+ ♜e7 2. ♚:f4-b8 ♙:c6-b7+ 3. ♜:e7-c6+ ♚:c6-e7#

3<sup>rd</sup> Prize – Bronze medal

Mars circe

The creation of black batteries using the Mars Circe condition is a well-known theme in the HS# genre. But here we see a rich complex in which the basic idea is superbly combined with other non-standard and interesting motifs. The role of rear battery-pieces is taken by the black Rook and Bishop, which are promoted by the pawn d2 and then leave the first rank with moves having a critical character. The white Knights demonstrate a reciprocal change in their functions: one of them closes the black piece, while the other is

sacrificed with the goal of opening a line for the forward battery-piece (♜b7 or ♚a7). A small drawback is that in the second solution the capture 2 ... d7xe6 is orthodox, but the black ♙d7 cannot stand on d6 because of a cook...

1...d1=♚! 2. ♜g6 ♚d5 3. ♜d3 h6-h7:g6 4. ♚h2+ ♚a7-h8:h2#

1...d1=♙! 2. ♜ce6 ♙f3 3. ♜e2 d:e6 4. ♚d2+ ♜b7-d8:d2#

PWC  
b2, b5, g2, g8: Nightrider-Hoppers

This problem demonstrates a unique set of 3 solutions with exact chameleon-echo stalemates! In the finales two of the black Nightrider-hoppers play as rear pieces of indirect anti-batteries, and the other two NHs block squares around the black King. A very important and pleasant phenomenon in this concept is the

fact that the 12th move of White is "silent", putting Black in zugzwang!

A similar problem (in 13 moves) but only in two phases with echo-stalemates has already been shown by Vaclav Kotesovec, Probleemblad, 2015 (White: Kd3 (1); Black: Kf2, NHg1, NHf3, NHe4, NHc7 (5), HS=13, 2 solutions.)

Therefore the new problem represents the development of an old idea, now in 12 moves with the addition of a third phase. In my opinion such a modification, though created using the fairy condition PWC less actively, is a big step forward. It gives the new problem the right to independent existence and deserves a special prize!

hs#7 2 sol 13+6

Here the author presents a very interesting and difficult complex Mixed AUW, Zilahi, white blocks on the "e1" square, non-standard tempo - moves and attempts in the black B1-phase. This rich content undoubtedly deserves a high ranking, despite the heavy construction and the inevitable monotony of the Pawn's play in such cases.

1. ♜e6! a5! (1...f5?) 2. b:a5 f5 3. a6 f:g4 4. a7 g:h3 5. a8=♚ h2 6. ♜e4 h1=♜ 7. ♜e1 ♜g2# [No 1...f5? 2.g:f5 a5 3.f6 a:b4 4.f7 b3 5.f8=♚ b2 6. ♜e8 b1=♜ and 7. ♜e1?? is impossible (w♚ is closed); no 1...f5? 2.b5 f:g4 3.b:a6 g:h3 4.a7 h2 5.a8=♚ h1=♜ 6. ♜e4 ?? - no tempo-move for Black!]

1. ♜c6! f5! (1...a5?) 2. g:f5 a5 3. f6 a:b4 4. f7 b3 5. f8=♚ b2 6. ♜e8 b1=♜ 7. ♜e1 ♜d2# [No 1...a5? 2.b:a5 f5 3.a6 f:g4 4.a7 g:h3

h#2,5      2 sol      1+1+3  
Partial Paralysis  
Leffie

One of the most exotic tasks in this tournament. The difficult combination of partial paralysis and Leffie is realised only with neutral pieces, which deserves particular attention. For that reason I will add some additional analysis to both solutions: I. 1...h8=♔ 2.b1=♔ n♖b4+ 3.a1=♙ n♖hb8#. The mate is given here after play of the battery n♖h8/n♙a1. The n♖h8 leaves the field h8 with the goal of activating n♙a1. Illegal is 4.n♙c3?? (with the idea of deactivating the n♙) because of Leffie (the contact n♖b4/n♙c3 is forbidden). Illegal is

also 4.n♖b6?? (by either n♖) because both n♖s are under reciprocal partial paralysis. An interesting try is: 2...n♖d1+? 3.a1=♙ n♖hh1+ 4.n♙c3!; II. 1...b4 2.a1=♔ h8=♔ 3.n♙f6+ b5#. Here the n♙h8 is only required to step on "f6" because after this move, the defence 4.n♙f1 (by either n♙) is illegal (the contact n♙f1-n♖b5 is forbidden according to Leffie). Not 3.n♙g7? n♖b5+ 4.n♙g1/n♙a7 and the n♙s are paralysed. Deep and beautiful ideas realised in Tanagra form but unfortunately without full thematic identity between the phases.

 Masand

A simple but nice task in which the Zilahi theme is combined with activity of the white King and model mates. However, in my opinion there exists some not so pleasant symmetry in the play.

- 1... ♖:d2    2. ♛g2(g4=b)+    ♔e1
