 wQ frees 4 different black pieces to stop its rebirth on d1, while
itself being immobilised by potential rebirths of same black
checking pieces.

Assassin circe: As circe, but the rebirth occurs even if the rebirth
square is occupied. The occupying piece is removed from the
board. When a piece is captured on its rebirth square, the capturing
piece disappears. Consequence: if a piece is attacked, then the
same colour king on the rebirth square of that piece is in check
