Fairy mate by triple check.

F3625 by the Israeli expert has only neutral pawns and the solver needs to find a position in which the black

king can be placed on the board into mate (Republican chess). There are no kings or checks until then.

Obviously echo mates are involved, but which pieces to create and how to configure a mate position are the

difficult tasks for solvers. In Einstein chess a unit making a capture is transformed in the sequence

P>S>B>R>Q>Q, and a unit making a non-capture is transformed in the sequence Q>R>B>S>P>P. There are no

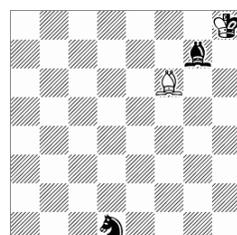

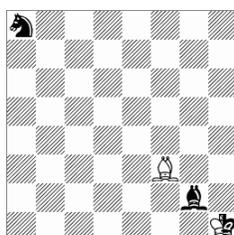

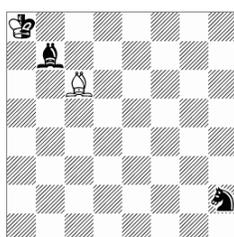

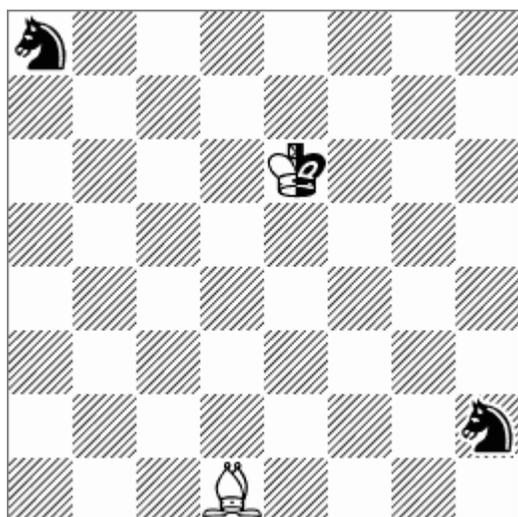

regular promotions. The NPc1 can be moved only by White and can move 1, 2 or 3 steps.
