1. ... EAh6 2. e8=B Bd6 3. Rd4 Sb1 4. Bxe2+ Rf1#

Line opening by the black eagle; pinning of a black knight by promotion in queen / bishop; anticipatory interference by the black bishop; block by the white rook; anticipatory interference by the black knight; check of the white queen / bishop by capturing the black knight can only be answered by the checkmate of the black rook by occupation of the initial square of the white queen / bishop; exchange of functions between the black knights, ODT, harmonic solutions. The anticipatory interferences by the black bishop / black knight prevent the black mate from being defended by the move of the white rook on the 8. rank / capture of the black rook by the white rook, the black eagle prevents the black mate from being defended by the white king capturing the black rook due to a self-chess.
